READING FOOD LABELS

Food labels have just about everything you need to know to make type 2 diabetes–friendly food choices. So, it’s important that you know how to read them. Here’s how.

Talk to your doctor about what nutrition plan is best for you.

Print this card and use it as a reference the next time you go grocery shopping.

SERVING SIZE

What you eat is important, but so is how much you eat. Serving sizes let you know the amount of nutrients and calories you get with each serving. All of the nutrition information below corresponds to one serving size. Most packages contain more than one serving so don’t confuse serving size with servings per container.

TOTAL FAT

Look at the amount of fats in each serving. Labels will include fats that are good for you (mono- and polyunsaturated fats) and ones that aren’t (trans and saturated fats). You should try to avoid foods that are high in trans and saturated fats.

PROTEIN

Protein is an essential nutrient in any healthy diet. To avoid cholesterol and saturated fats, choose low-fat milk products, lean cuts of meat and poultry, and seafood.

HERE ARE SOME QUICK WAYS TO MEASURE.

When you’re dining out or if you don’t have measuring cups or scales with you, you can use your hand. It’s not exact, but it may help you choose servings.

Your fist is about 1 cup.

Your palm is about 3 ounces.

Your thumb tip is about 1 tablespoon.

Your fingertip is about 1 teaspoon.

Necessary labels. Check calories. Your healthcare provider will let you know how many calories you should eat each day.

TOTAL CARBOHYDRATE

This includes sugars, starches, and fiber. % Daily Value (DV) of total carbohydrate tells you the DV of carbohydrates in a product. If your doctor told you to count carbs as part of your type 2 diabetes management plan, this is a very important place to look. Carbohydrates break down into sugar in the body.

SUGARS

Sugars raise blood sugar quickly. So, try to avoid foods with high amounts of added sugar.

Calories

Check calories. Your healthcare provider will let you know how many calories you should eat each day.
